

DMC2058A

One-Step Banding Tool Kit

The DMC2058A tool kit has the tools and accessories necessary for banding EMI shielding in a single step. DMC's one-step banding tools are built to SAE AS81306/1 specifications. The tension-lock system gives the operator a positive indication when the precise tension has been applied and the cut-off handle seamlessly cuts, bends, and locks the shield band. Stamped bands conform to AS85049 and are made from corrosion resistant steel.

The DMC2058A tool kit contains tooling and banding for 0.250 and 0.125 applications. Also included are verification gages and a tension adjustment key.

KIT CONTENTS

QUANTITY	DMC P/N	DESCRIPTION	MILITARY P/N
1	DBS-2100	.250 WIDE BAND ONE-STEP TOOL	M81306/1A
1	DBS-2200	.125 WIDE MINI-BAND ONE-STEP TOOL	M81306/1B
1	DBS-CG7	VERIFICATION GAGE	M81306/1C
1	DBS-CG8	VERIFICATION GAGE	M81306/1D
1	DBS-2100-32	TENSION ADJUSTMENT KEY	M81306/1E
10	DBS-128-3	.250 WIDE STAMPED BAND - FLAT	M85049/128-3
10	DBS-128-7	.125 WIDE STAMPED MINI-BAND - FLAT	M85049/128-7
