SAFE-T-CABLE® TOOL KITS

The Ultimate Fastener Retention System

Safe-T-Cable® is a reliable, time-saving solution for fastener security that is widely used in aerospace, rail, marine, and energy industries. In addition to installing faster than lockwire, Safe-T-Cable also produces a stronger and safer result.

Safe-T-Cable tool kits are travel-ready systems manufactured to meet the most demanding conditions. A variety of Safe-T-Cable tool kits are available including multi-tool configurations with and without verification equipment. For custom solutions, please contact DMC.

FASTER & SAFER INSTALLATIONS

- Installs 3 times faster than lockwire
- Eliminates sharp edges
- Reduces repetitive motion injuries
- Minimizes FOD

IMPROVED SECURITY

- Constructed from high tensile strength cable
- Produces repeatable installations with consistent cable tension

ADVANCED PERFORMANCE

- Cuts and crimps simultaneously
- Reduces learning curve and rework
- Resistant to high temperatures and corrosion

KIT CONTENTS

1	**SCT327:** Pre-set Tension Tool for .032” with 7” Nose
2	**C10-218PKG:** Cable Assemblies and Ferrules .032” X 18” (50PC/PKG)
1	**SCT-TB1:** Torque Verification Block
1	**45-6N:** Diagonal Cutter
1	**4-1501:** 9/64" Hex Wrench
1	Flat Blade Screwdriver
