

SAFE-T-CABLE™ TOOL KITS

The Ultimate Fastener Retention System

Safe-T-Cable™ is a reliable, time-saving solution for fastener security that is widely used in aerospace, rail, marine, and energy industries. In addition to installing faster than lockwire, Safe-T-Cable also produces a stronger and safer result.

Safe-T-Cable tool kits are travel-ready systems manufactured to meet the most demanding conditions. A variety of Safe-T-Cable tool kits are available including multi-tool configurations with and without verification equipment. For custom solutions, please contact DMC.

FASTER & SAFER INSTALLATIONS

- Installs 3 times faster than lockwire
- Eliminates sharp edges
- Reduces repetitive motion injuries
- Minimizes FOD

IMPROVED SECURITY

- Constructed from high tensile strength cable
- Produces repeatable installations with consistent cable tension

ADVANCED PERFORMANCE

- Cuts and crimps simultaneously
- Reduces learning curve and rework
- Resistant to high temperatures and corrosion

KIT CONTENTS

- | | |
|---|-------------------------------------------------------------------------|
| 1 | SCTR203: Adjustable Tension Tool for .022" with 3" Nose |
| 1 | SCTN20-7: 7" Nose Assembly (.022") |
| 2 | C10-118PKG: Cable Assemblies and Ferrules .022" X 18" (50PC/PKG) |
| 1 | SCT-TB1: Torque Verification Block |
| 1 | 45-6N: Diagonal Cutter |
| 1 | 4-1501: 9/64" Hex Wrench |
| 1 | Flat Blade Screwdriver |
