

# SAFE-T-CABLE™ TOOL KITS

## The Ultimate Fastener Retention System

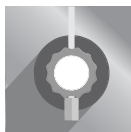

Safe-T-Cable™ is a reliable, time-saving solution for fastener security that is widely used in aerospace, rail, marine, and energy industries. In addition to installing faster than lockwire, Safe-T-Cable also produces a stronger and safer result.

Safe-T-Cable tool kits are travel-ready systems manufactured to meet the most demanding conditions. A variety of Safe-T-Cable tool kits are available including multi-tool configurations with and without verification equipment. For custom solutions, please contact DMC.

### FASTER & SAFER INSTALLATIONS

- Installs 3 times faster than lockwire
- Eliminates sharp edges
- Reduces repetitive motion injuries
- Minimizes FOD

### IMPROVED SECURITY

- Constructed from high tensile strength cable
- Produces repeatable installations with consistent cable tension

### ADVANCED PERFORMANCE

- Cuts and crimps simultaneously
- Reduces learning curve and rework
- Resistant to high temperatures and corrosion

### KIT CONTENTS

- |   |   |
|---|---|
| 1 | <b>SCTR203:</b> Adjustable Tension Tool for .022" with 3" Nose                  |
| 1 | <b>SCTN20-7:</b> 7" Nose Assembly for .022" Tool                                |
| 2 | <b>C09-118PKG:</b> Cable Assemblies and Ferrules .022" X 18" Inconel (50PC/PKG) |
| 1 | <b>SCT-TB1:</b> Torque Verification Block                                       |
| 1 | <b>45-6N:</b> Diagonal Cutter   |
| 1 | <b>4-1501:</b> 9/64" Hex Wrench   |
| 1 | Flat Blade Screwdriver  |
