

# DMC601 BACKSHELL TOOL KIT FOR CIRCULAR ELECTRICAL CONNECTORS

**DMC601 Backshell Tool Kit for Circular Electrical Connectors**

There are many delicate, hard to reach and hard to handle parts during the assembly and disassembly of circular electrical connectors. The tools provided within the DMC601 provide the solution without marring or damaging the connectors.

## THE DMC SOLUTION...

The strap wrenches provided are engineered for infinite adjustment to a wide range of diameters. The strap material is manufactured of special reinforced, high-tensile strength composition providing long service life and its anti-slip surface will not mar metal or plastic.

The parallel jaw pliers are precision machined, each with two different size gripping jaws with each size capable of holding several shell sizes. Slots machined in the jaws of the pliers provide clearance for bayonet pins on receptacle connectors.

The torque wrench is also precision constructed and has a torque range of 0 to 150 inch-pounds. When used in conjunction with the 3" diameter strap wrench, the torque wrench gives controlled, accurate tightening, which is particularly desirable for connectors and accessories used in EMI/RFI applications.

## DMC601 TOOL AND ACCESSORY LIST

	6	Connector Wrenches
	1	Cable Tie Tool
	3	Strap Wrenches
	1	Soft Jaw Plier
	1	T-Handle Wrench
	1	Torque Wrench
	1	Socket Driver
	1	Adaptor
	1	China Marking Pencil

## TOOL KIT CONFIGURATION

Type of Case	Portable
Number of Cases	1
Color	Green
Type of Construction	Fiberglass/Aluminum
Application	CW Backshell Connectors
Type of Inserts	4101 Fire Retardant Etha Foam with Die Cut Tool Cavities
