

Remove Cable Ties, Lacing Tape, and Straps Efficiently with No Damage to Wire Insulation

Safely remove cable ties or lacing tape from wire harnesses or cable bundles. This heat treated alloy steel tool has a hooked blade with a safety guard that slides behind the cable tie to prevent cutting or nicking the insulation of the wires. Softly padded and ergonomically shaped handles make the tool comfortable to use and a locking lever keeps the tool closed when it is not in use.

- **Ensured Protection** - Safety guards prevent the sharp blades from contacting the bundled items
- **Comfortable and Easy to Use** - Ergonomic, cushion grip handles maximize natural hand contraction motion, and are assisted with an auto return spring
- **Versatile** - Retrofit and repair wire harnesses, remove packaged items, and many other factory and field use applications. The MG-1300 cuts all widths of cable ties and lace.
- **Heat Treated Alloy Steel** - Provides long life when cutting plastic, copper, or aluminum
- **Scissor Action Cutter** - Produces clean cuts

SPECIFICATIONS

- L x W: 6.5 x 2.4 (in) 165 x 70 (mm)
- Cuts Cable Tie Sizes 18 lb to 250 lb
